PROFESSIONAL SUMMARY

Full-Stack & Mobile Engineer (TypeScript, NestJS, React / Next.js, Flutter) who ships complete products end to end: backend APIs, admin dashboards, web frontends, Flutter mobile apps, and Electron / Tauri desktop apps. Delivered 14+ production systems across education, ride-hailing, retail, construction, travel, and marketing, including payment gateways (Paymob, Fawaterak), Egyptian Tax Authority e-receipts, real-time features over Socket.IO, RBAC + ABAC authorization, offline-first sync, and CI/CD to Linux VPS, Cloudflare, and Vercel.

EXPERIENCE

Backend Engineer
Mar 2026 – Present

Salam Academy ERP — Enterprise SaaS (Education) · salamacademy.edu.eg — Remote

- **Architected a dynamic RBAC + ABAC permission system** (grants, revocation, delegation, page-level authorization) across 67 controllers and 500+ route handlers, rolled out additively with zero breaking changes.
- **Owned core modules end to end:** exams & grades control, attendance, HR and hiring, buses and logistics, parent payments, and academic-year transition with validated, scheduled ledger snapshots.
- **Built the finance integrations:** Fawaterak online payments (cards, valU, Fawry) with webhooks and eligibility rules, and Egyptian Tax Authority (ETA) eReceipt e-invoicing (OAuth, document signing, submission, callbacks).
- **Designed the PostgreSQL schema and led the legacy-data migration** through a phased, dry-run import pipeline with audit artifacts and rollback SQL — zero data loss.
- **Shipped the web and desktop clients:** packaged the React ERP as a Tauri v2 desktop app with auto-update, built parent-portal pages (enrollment, stage promotion, news), and deployed to Cloudflare Workers.
- **Owned CI/CD and production operations:** GitHub Actions, migrations with automatic rollback, PM2 cluster mode — 99.9% uptime; cut p95 latency 35% via indexing, query optimization, and Redis caching.

Stack: NestJS, TypeScript, Prisma 7, PostgreSQL, Redis, BullMQ, React, Vite, TanStack Query, Tauri v2, GitHub Actions, PM2, Cloudflare Workers

Backend Engineer
Nov 2025 – Oct 2026

RAR-IT Development LLC — Remote

- **Lasscar transportation platform:** built airport, courier, and freight trip modules with BullMQ dispatch and auto-cancel queues, real-time driver matching over Socket.IO, wallet, pricing, loyalty, SOS, and bilingual FCM push notifications.
- **Hey loyalty backend:** points ledger, rewards, scoped coupons, referrals, notifications, CMS, analytics, and support tickets.
- **EduSuite multi-tenant SaaS** (Fastify, Drizzle, Zod): tenant provisioning, plan entitlements, enrollment with capacity limits, report cards — 13 merged pull requests with CI.

Stack: NestJS, Fastify, Express.js, TypeScript, Prisma, Drizzle ORM, PostgreSQL, MySQL, Redis, BullMQ, Socket.IO, Firebase Admin

Freelance Full-Stack & Mobile Engineer
Jun 2024 – Present

Independent / Project-Based — Remote

- Delivered production products end to end as the sole or lead engineer — backend, web, admin dashboard, mobile, and desktop — from architecture and API contracts to deployment and maintenance (selected projects below).
- Standardized delivery on a personal NestJS starter (ESM, Prisma 7, Zod, Vitest) reused across client APIs, with JWT + rotating refresh tokens, Argon2id, idempotency keys, transactional outbox, and GitHub Actions deploys.

SELECTED PROJECTS

The Ride — Ride-Hailing Platform (Backend, Admin, Flutter Apps, Landing)

- Built the backend alone: 22 modules, 178 REST endpoints, 2 WebSocket gateways, 80+ models, 38 test files — trip dispatch and offers, live tracking, scheduled trips, chat, Paymob and Fawaterak payments, and admin TOTP MFA.
- Implemented a wallet with a double-entry ledger, settlements, cash-commission tracking, reconciliation, transactional outbox, and driver documents with ClamAV scanning.
- Built the React admin console (live trips, captains, zones and pricing, finance, refunds, audit diff) and 92% of the Flutter driver app; added Google Routes ETA, chat, and maps to the Flutter customer app.

Stack: NestJS 11, Prisma 7, PostgreSQL, Redis, BullMQ, Socket.IO, React, TanStack Query, Zustand, Flutter, BLoC, Google Maps, FCM

OBEER GO — Ride-Hailing Mobile Apps · Google Play

- Wrote 67% of the customer app and 46% of the captain app: Firebase setup, phone auth, pricing logic, nearby-captain search, Google Places search, map markers, FCM notifications, localization, and release builds.
- Wrote Firebase security rules with validation for users and trips; built dashboard and pricing screens in Flutter Web.

Stack: Flutter, BLoC, get_it, go_router, Firebase (Auth, Realtime DB, FCM, App Check, Crashlytics), Cloud Functions, Google Maps

POS Desktop — Offline-First Retail Point of Sale

- Sole developer of an Arabic-first POS for Egyptian shops: sales and returns, FEFO batch inventory on an append-only stock ledger, shifts and Z-reports, 35 permissions with supervisor PIN override, thermal printing, and ETA e-receipts.
- Built LAN multi-till mode over pinned HTTPS with server-sent events and outbox-based cloud sync; 140 unit and 16 end-to-end tests.

Stack: Electron, React, TypeScript, SQLite (better-sqlite3), Drizzle ORM, Fastify, TanStack Query, Zustand, Tailwind, Vitest, Playwright

El-Azhar Agency — Multilingual Storefront & Admin · elazhar-agency.io

- Owned the API (78 endpoints, 18 test files): quote-based ordering, WhatsApp OTP and webhooks, Excel import / export with validation, catalog in 11 languages, real-time notifications; integrated and deployed the Next.js storefront.

Stack: NestJS 11, Prisma 7, PostgreSQL (pg_trgm), Socket.IO, S3 / R2, ExcelJS, Next.js 16, next-intl

Orlen Construction — Company Website & CMS · orlen-eg.com

- Sole developer: contract-first API (80 endpoints, 17 test files), CMS for projects, services, and careers, Turnstile-protected forms, WebP image pipeline, PostgreSQL outbox with retries, per-page SEO, and the React frontend.

Stack: NestJS 11, Express 5, Prisma 7, PostgreSQL, Zod, sharp, S3 / R2, React, Vite, Cloudflare Workers

Bood — Marketing Agency Website & CMS · boood.sa

- Owned the API (14 modules, 95 endpoints) built to an API contract so the Next.js frontend switched from mock data with no UI changes; handled frontend integration and Vercel deployment.

Stack: NestJS 11, Prisma 7, PostgreSQL, Zod, Docker, Next.js, RTK Query, Tailwind, Vercel

Steel Pipes — Industrial Company Website · steelpipes.sa

- Sole developer of a 17-page animated corporate site (products, coating systems, oil & gas, QHSE, news).

Stack: React, Vite, Framer Motion, Lenis, Cloudflare Workers

Infipeak — B2B Consulting & Video-Meeting Marketplace · infipeak.co

- Lead backend and frontend: 195 endpoints, timezone-aware bookings, LiveKit video consultations, real-time chat, disputes, Google OAuth and OTP, CMS; built about half of the React web app (AR/EN).

Stack: NestJS, Prisma, PostgreSQL, BullMQ, Socket.IO, LiveKit, React, Redux Toolkit, TanStack Query, Playwright

More work: ASD (MERN construction platform), ArabFilmDB (film database, Express + React), Golden Phoenix Travel (Next.js), 9PTA travel agency (Next.js + Firebase), and a QR restaurant-ordering system (Express, Socket.IO, Stripe).

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES2022+), Dart, SQL
Frontend: React, Next.js 16, Vite, TanStack Query, Redux Toolkit, Zustand, Tailwind CSS, shadcn/ui, Ant Design, i18next / next-intl (Arabic RTL), Framer Motion
Mobile & Desktop: Flutter (BLoC, Clean Architecture, go_router), Firebase, Google Maps / Places / Routes, FCM, Electron, Tauri v2, auto-update
Backend: Node.js, NestJS, Express.js, Fastify, REST, Swagger / OpenAPI, WebSockets (Socket.IO), BullMQ, event-driven architecture
Databases & ORM: PostgreSQL, MySQL / MariaDB, MongoDB, SQLite, Redis, Prisma 7, Drizzle ORM, Mongoose, schema design, query optimization
Security & Patterns: JWT with refresh rotation, OAuth2 (Google), OTP, TOTP MFA, RBAC / ABAC, double-entry ledger, transactional outbox, idempotency keys, offline-first sync, audit logging
Integrations: Paymob, Fawaterak (valU, Fawry), Stripe, ETA eReceipt, LiveKit, WhatsApp, Cloudinary, S3 / Cloudflare R2, Resend, Turnstile, Sentry
DevOps & Testing: GitHub Actions, Docker, PM2, systemd, Nginx, Linux VPS, Cloudflare Workers, Vercel, Firebase Hosting; Jest, Vitest, Playwright
Spoken languages: Arabic (native), English (good)

EDUCATION & CERTIFICATIONS

Bachelor's Degree, Geographic Information Systems (GIS) Egypt
Faculty of Arts, Aswan University

Front-End & Cross-Platform Mobile Development (MERN Stack) — ITI, Aswan Mar 2025 – Jul 2025
Certifications: Meta: Front-End Development, React.js, Responsive Web Design, JavaScript, Bootstrap 5 · ITI: Web Technologies (HTML5, CSS3, JavaScript) · MongoDB Certified (Mahara-tech)
